

Dear FCC, I was slow to move to the satellite radio, but now I am so impressed I have been trying to move my friends over to the system. I have been disappointed with regular radio for years because of its myopic and controlling view of music. Now the answer has been given to me with XM and I am happy to pay for it. To allow the NAB to try and control something that I pay for and welcome is an insult to my free choice of a music and information provider. Haven't they abused my good taste long enough. Please, respectfully ask you to reject NAB's petition 04-160. As a consumer I have the right to choose a better product.
